

## Canadian Foursomes Format

- This game is played with a Partner and is a stroke game.
- Both players tee off on all holes.
- The players decide which shot is in the "best position" and take the other player's ball out of play.
- If player A hit the "best" positioned tee shot, player B will then hit the next shot. The players alternate until the completion of the hole.
- If a penalty shot is incurred, this does not impact the order of play.
- The handicap of the team is calculated by adding each player's Daily Handicap and multiplying it by 3/8ths. If using MiScore, it will calculate this for you.
- The stroke score for each hole is recorded and the team with the lowest score is the winner.
